

# New Evidence New Solutions

Over 15 peer-reviewed-published studies  
validate proven efficacy.

Increased patient compliance due to nighttime-only wear. Major psychological benefits realized by eliminating stigma associated with day-time bracing. Full participation in daily activities facilitated without restriction.

Proven equally effective as 23-hour bracing systems, especially with curves less than 35 degrees.

CBB - Standard

- MPE (Modified Polyethelene)
  - Anterior Opening
  - Dynamic Lumbar Pad (CBB Type II Curve Only)

CBB - Lite

- Softer Polyera Material
- Recommended for Smaller Patients
